1. Our Project

We are creating a Governance System supported by Tron TRC20 protocol Smart Contract with combining 2 tokens into 1 system that supports each other as an Ecosystem in the token itself. In another word, we are creating something that has never existed before where one token help gains another token and is mutually sustainable in raising prices and needing each other and so on and so on.

We always embraced the decentralized system which is Transparent and Trust minimization. All the transaction in our governance system is contributing to both TRC 20 protocol development as with our Main Governance ecosystem.

It only means 1 thing. This project comes because of you (need), with all of you (community), and for you (common interest). Community is the asset we strongly support and our mission this project will be publicly owned and self-sustainable infrastructure for our community common interest.

The main impact of this loop ecosystem can only help maintain the community as well with Super bullish in market price and makes a very complete user-friendly ecosystem by providing mining power, future crypto banking, staking, lending, borrowing, liquidity pools, and many other platforms.

I. What is SMARTWAY?

Smartway Finance is a smart gateway in DeFi governance to get another official token which can be used to mining Smart (Loop Mining System). With SMART, we create a continuous market by getting token after token that helps to mine with each other. It's a never-ending circle (loop) to maintain price and public interest in the market.

Our Developer makes this innovative governance program called LOOP MINING SYSTEM complete with a backup system such as the official website, internal Justswap.org, and internal wallet and exchanger and full roadmap to create a sustain community as well.

A complete ecosystem makes stronger sustainability coin in the market. More and more rewards will be given just to make things interesting and upgrading. Starting with FREE Airdrop.

Here the mechanism of SMARTWAY.FINANCE

1. Airdrop Smart
2. Exclusive Offer with Referral
3. JustSwap (fully supported by TRC20)
4. Staking Smart -> Get Rich
5. Hold Rich -> Mining Smart
6. Token listed in very big Exchanger
7. Governance ecosystem (new innovation banking system in Crypto World)
8. Many Ecosystems are waiting

We think through whole processes just to makes sure the continuity of Smartway Finance in the future.

II. What Is RICHWAY?

Richway is the result of the SMART Token gateway, where Richway's existence means as an official token and as a mining machine in the form of energy and bandwidth that generates power for mining SMART tokens

2. Main of Function

I. SMARTWAY

SMARTWAY Token can also function for Staking to get **RICHWAY** Tokens

Staking Information:

You have Staked 10 SMARTs, then your Smart contract will display 100 **RICH** Tokens which you can get in 1 year, the rewards are issued every second, whenever you can unstake.

II. RICHWAY

RICHWAY Token functions to buy Bandwidth, Energy to get **POWER** in Cloud mining for both smart contracts and upcoming official tokens.

Cloud Mining Information:

Total Global Power / Total Reward = Value per power

Your total power * Total Rewards = The amount you get

SMART – Stake to get RICH
RICH – Buy mining Cloud to get SMART

Therefore, we called it Loop Mining System in our Governance project Smartway Finance. Because it's a never-ending solution to backup token to another token in the future market.

3. Decentralized

Smartway Staking and Cloud mining are decentralized via the TRC20 Tron protocol smart contract and are supported by Justswap and several well-known exchangers. In the future, we also plan to create our own open-source wallet and exchanger complete with all the features the community needs.

4. Token Information

I. SMARTWAY

Smart Contract	: TRC20
Name of the Token	: SMARTWAY
Ticker of the token	: SMART
Maximum Supply	: 25,000
Decimal	: 18

II. RICHWAY

Smart Contract	: TRC20
Name of the Token	: RICHWAY
Ticker of the token	: RICH
Maximum Supply	: 500,000
Decimal	: 18

5. Token Distribution

I. SMARTWAY

- 1.1. Airdrop (0.5%)
- 1.2. Exclusive Offers (20%)
- 1.3. Cloud Mining Reward (40%)
- 1.4. Liquidity Pool (12%)
- 1.5. Future Development (27.5%)

1.1. Airdrop (125 SMART)

For the initial stage, we use the airdrop method which is free for all users registered on our platform. The most important thing is that all of you can enjoy the results of the SMART smart contract protocol and we will always provide valuable rewards for the communication that has been formed.

125 SMART (Total Airdrop / Total users = Rewards)

Example :

- (1) Total Airdrop 125 SMART / Total user 5,000 = then per user gets the number of smarts (0.025)
- (2) Total Airdrop 125 SMART / Total user 10,000 = then per user gets the number of smarts (0.0125)

1.2. Exclusive offers (5,000 SMART)

5,000 SMART With Price 3,700 TRX / 1 SMART

The Exclusive offer is only available for 14 days as many as 5,000 SMART, unsold Tokens during the period (EO) So we will burn the rest if there is anything left

Min Purchase is 370 TRX (0.1 SMART)

Maximum purchase 37,000 TRX (10 SMART)

1.3. Cloud Mining Reward (10,000 SMART)

10,000 SMART For 24Month and rewards are issued every second

Reward calculation

10,000 SMART / 730 days / 24 hours / 60 minutes / 60 seconds = Reward per second

To get Reward SMART tokens You must have CLOUD MINING POWER
To get cloud mining power you have to use RICH TOKEN to activate your cloud mining.

1.4. Liquidity Pool (3000 SMART)

From the sale of the Exclusive offer (EO) 60% will be put in
The liquidity pool is initiated to ensure that the SMART price at the beginning
can get market stability and confidence in our smart tokens.

1.5. Future Development (6,875 SMART)

It will be used for future project development, such as Exchanger, Lending,
Borrowing, Collateral and building its own PROTOCOL in the future.

II. RICHWAY

1.1. Airdrop (10%)

1.2. Liquidity pool (20%)

1.3. Staking Reward (70%)

1.1. Airdrop (50,000 RICH)

A total of 50,000 RICH will be distributed to those who buy the
SMART Token starting with a share of 1/10.

Example:

- (1) buy 1 SMART, then you will get 10 RICH TOKEN
- (2) buy 10 SMART then you will get 100 RICH TOKEN

Terms of Conditions

The RICH token that you have obtained through (EXCLUSIVE
OFFER) cannot be traded on justswap or on an external exchange, the
RICH TOKEN can only be used to get POWER Cloud Mining for you
to get (SMART TOKEN).
after 12 months you can buy and sell your tokens in the market.

1.2. Liquidity pool (100,000 RICH)

A total of 100,000 RICH tokens will be put into the Liquidity pool
with a TRX combination of 20% of the proceeds from the sale of the
Exclusive offer SMART token.

1.3. Staking Reward (350,000 RICH)

To get a RICH Token you have to do your Staking SMART token
through the platform we have provided.
